Ligno-Mix C

Ligno-Mix C is a substrate for containers, with a high share of white peat and *Lignodrain*® for the outdoor production in nurseries.

Ligno-Mix C offers the following advantages:

- high air capacity and good drainage ability
- excellent capillarity and high structural stability

Composition:

60 % white peat
10 % frozen black peat
30 % Lignodrain®
500 g NPK-fertilizer /m³
250 g N-fertilizer depot (25-0-0)/m³
100 g Trace elements

options:

Structure: medium-coarse or coarse

pH-value: 5,0 - 5,5 or 5,5 – 6,0

Slow release fertilizer:
Osmocote® Exact standard: 3-4 M
5-6 M
8-9 M
12-14 M

We recommend **Ligno-Mix C** for the outdoor-cultivation in containers.
