

PRO verde

PRO verde is suitable for plants with a long culture period in the field of ornamental plants and tree nursery. For the glasshouse cultivation, e.g. for green plants or cut flowers, for the outdoor cultivation, e.g. for deciduous trees and conifers in containers.

PRO verde offers the following advantages:

- high structural stability by peat fibres and high share of white peat
- good drainage ability by the coarse fibrous structure
- various use by fertilization of 1000 g NPK and a pH-value of 5,5-6,0

Composition: 30 % white peat (25 – 40 mm)
40 % white peat (10 – 25 mm)
30 % peat fibres
1000 g PG-Mix (14-16-18)/m³
150 g trace elements/m³

Structure: coarse-fibrous

Chemical values: pH-value (CaCl₂): 5,5 - 6,0
(according to LUFA*) Salt content: 0,7 - 1,2 g/l
Nitrogen, N: 80 - 180 mg/l
Phosphorus, P₂O₅: 120 - 200 mg/l
Potassium, K₂O: 170 - 280 mg/l

We recommend **PRO verde** for pots ≥ 15 cm or containers of 1,5 l.

Packing: bags 70 l, Maxi-Block 3,75 m³, in bulk (EN)

*LUFA: independent, public laboratory
