

Gartentorf

TerraBRILL Gartentorf can be variously used, i.e. for the treatment of soils, for loosen heavy soils and for the improvement of the water capacity of light, pervious soils. It is also suitable for the new cultivation of trees and herbaceous plants as well as for the preparation and covering of plant beds.

TerraBRILL Gartentorf contains no additions, the share of organic substance is approx. 90 %.

TerraBRILL Gartentorf offers the following advantages:

- high water retention capacity
- high buffer capacity for the pH-value and the nutrients

Composition: 100 % frozen black peat

Structure: medium-fine

Chemical values:
(available nutrient contents)

pH-value (CaCl ₂):	3,0 - 4,0
Salt content:	< 0,4 g/l
Nitrogen N:	< 30 mg/l
Phosphorus K ₂ O:	< 30 mg/l
Potassium P ₂ O ₅ :	< 40 mg/l

Packing: bags in 70 l (EN)

The packing is marked with an EAN-code and the "Grüner Punkt".
