

Orchideenerde

TerraBRILL Orchideenerde is a special potting substrate with a high share of coarse pine bark especially adjusted to the demands of plants growing at trunks and branches of trees and shrubs. This substrate is suitable for potting and repotting of orchids, e.g. Phalaenopsis and Odontoglossum.

TerraBRILL Orchideenerde is slightly fertilized and contains all the nutrient substances incl. trace nutrients necessary for the growing of plants.

Composition:

- 45 % white peat
- 45 % coarse pine bark
- 10 % Perlite
- 750 g fertilizer NPK/m³

Structure: coarse

Chemical values:

(available nutrient contents)

pH-value (CaCl ₂):	5,5 - 6,0
Salt content:	0,7 - 1,2 g/l
N:	100 - 160 mg/l
P ₂ O ₅ :	120 - 180 mg/l
K ₂ O:	140 - 200 mg/l

TerraBRILL Orchideenerde is available in bags of 5 L (EN), packed in display packs with 130 bags / display on half-pallets.

The packing is marked with an EAN-Code and the "Grüner Punkt".
