

## Pflanzhumus

**TerraBRILL Pflanzhumus** is a potting substrate, which can be variously used, i.e. for the treatment of soils, for loosen heavy soils and for the improvement of the water capacity of light, pervious soils. This substrate is also suitable for planting trees and herbaceous plants as well as for preparing and covering plant beds for ornamental plants and vegetables.

**TerraBRILL Pflanzhumus** has a basic fertilization and contains all nutrient substances incl. trace nutrients necessary for the growing of plants.

**TerraBRILL Pflanzhumus** offers the following advantages:

- high water retention and buffer capacity for the pH-value and the nutrients by the frozen black peat
- good air capacity and drainage ability by the part of white sphagnum peat

**Composition:** 25 % white peat  
75 % black peat  
1500 g fertilizer NPK/m<sup>3</sup>

**Structure:** medium-fine

**Chemical values:** pH-value (CaCl<sub>2</sub>): 5,0 - 6,0  
(available nutrient content) Salt content: 1,2 - 1,7 mg/l  
\* N: 130 - 290 mg/l  
\* P<sub>2</sub>O<sub>5</sub>: 140 - 340 mg/l  
\* K<sub>2</sub>O: 170 - 390 mg/l

**Packing:** bags in 45 l and 70 l (EN)  
The packing is marked with an EAN-code and the "Grüner Punkt".
