

Royal Blumenerde

TerraBRILL Royal Blumenerde is a special substrate with all the nutrients necessary for the growing of plants and is suitable for the various uses in the in- and outdoor area, i.e. for pot flowers and indoor plants, for potting of the whole range of summer flowers in boxes and buckets and especially in large vats.

TerraBRILL Royal Blumenerde contains frozen black peat, clay and hydro gel for water and nutrients storage. The hydro gel provides the plant with more water and prolongs the frequency of irrigation. The high share of white peat improves the air capacity and the **slow-release fertilizer** supplies with additional with nutrients during the first 15 weeks.

Composition:	65 % white peat
	35 % black peat
	75 l clay/m ³
	2000 g min. fertilizer NPK/m ³
	1500 g slow release fertilizer 5-6 M/m ³
	20 g iron chelat/m ³
	1500 g hydrogel/m ³

Structure:	medium
-------------------	--------

Chemical values:	pH-value (CaCl ₂):	5,5 - 6,0
(available nutrient contents)	Salt content:	1,2 – 1,7 g/l
	Nitrogen, N:	150 - 250 mg/l
	Phosphorus, P ₂ O ₅ :	180 - 300 mg/l
	Potassium, K ₂ O:	230 - 380 mg/l

TerraBRILL Royal Blumenerde is packed in bags of 45 l (EN).

The packing is marked with an EAN-code and "Grüner Punkt".
