

Tonerde 3

Tonerde 3 has a fine structure and is used for the propagation of plants, for sowing, pricking and cuttings.

Tonerde 3 offers the following advantages:

- the share of clay, which gives the substrate a good buffer capacity
- high structural stability of the substrate and air capacity by the share of white peat
- high water retention by the balanced part of frozen black peat

Composition: 65 % white peat
35 % frozen black peat
100 l clay/m³
500 g NPK- fertilizer /m³

Structure: fine

Chemical values: pH-value (CaCl₂): 5,5 - 6,0
(according to LUFA*) Salt content: 0,4 - 0,9 g/l
Nitrogen, N: 60 - 90 mg/l
Phosphorus, P₂O₅: 60 - 100 mg/l
Potassium, K₂O: 80 - 130 mg/l

We recommend **Tonerde 3** for the filling of cultivation plates with cells > 2,5 cm in diameter. For smaller cells we recommend **Typ 3 special**.

Packing: bags 70 l, Maxi-Block 3,25 m³, in bulk (EN)

*LUFA: independent, public laboratory
