

Type 3 special

Type 3 special has a very fine structure and is used for the propagation of plants, for sowing, pricking and cuttings.

Type 3 special offers the following advantages:

- excellent structural stability of the substrate and air capacity by the share of white peat
- high water retention and buffering capacity of pH-value by the balanced part of frozen black peat

Composition: 50 % black peat
50 % white peat
1000 g NPK- fertilizer /m³

Structure: very fine

Chemical values: pH-value (CaCl₂): 5,5 - 6,0
(according to LUFA*) Salt content: 0,7 - 1,2 g/l
Nitrogen, N: 100 - 160 mg/l
Phosphorus, P₂O₅: 120 - 200 mg/l
Potassium, K₂O: 140 - 240 mg/l

We recommend **Type 3 special** for the filling of cultivation plates with small cells < 3 cm (Trays, multi plates with small cells etc.).

Packing: bags 70 l, Maxi-Block 3,25 m³, in bulk (EN)

*LUFA: independent, public laboratory
