

## Type 4 soft

**Type 4 soft** is a fine structured blocking substrate with a higher share of white peat. **Type 4 soft** is used for the propagation of salt-tolerant young vegetable plants in peat blocks and also for ornamental plants, which are cultivated in larger blocks.

**Type 4 soft** offers the following advantages:

- high water retention and buffering capacity of pH-value because of the frozen black peat
- better drainage und root development by the share of white peat
- quicker water absorption in case of drying out by the high share of white peat

**Composition:** 70 % black peat  
30 % white peat  
1600 g NPK- fertilizer /m<sup>3</sup>

**Stucture:** fine

**Chemical values:** pH-value (CaCl<sub>2</sub>): 5,5 - 6,0  
(according to LUFA\*) Salt content: 1,1 - 1,6 g/l  
Nitrogen, N: 170 - 290 mg/l  
Phosphorus, P<sub>2</sub>O<sub>5</sub>: 200 - 330 mg/l  
Potassium, K<sub>2</sub>O: 250 - 410 mg/l

We recommend **Type 4 soft** for salt-tolerant young vegetable plants and ornamental plants cultivated in larger blocks.

Packing: bags 70 l, Maxi-Block 2,75 m<sup>3</sup>, in bulk (EN)

\*LUFA: independent, public laboratory
