

WPS coarse B

WPS coarse B (White peat substrate medium, Basis) is used as a basis for potting of ornamental plants. The substrate has no fertilizer.

WPS coarse B offers the following advantages:

- high air capacity and elevated drainage
- high substrate stability
- increased rewetting ability by the wetting agent

Composition: 100 % white peat (H3 – H5)
+ wetting agent

Structure: coarse

PH-value (H₂O): 5,5 - 6,5

We recommend **WPS coarse B** for pots ? 15 cm.

Packing: bags 250 l, Maxi-Block 4,5 m³ (EN)
