

WPS fine B

WPS fine B (White peat substrate fine, basis) is a substrate with 100 % high quality white peat and fine structured (< 10 mm). It is used as a basis for the propagation of plants, for sowing, cuttings, pricking and also for small pots. The substrate has no fertilizer.

WPS fine B offers the following advantages:

- high air capacity and elevated drainage
- high substrate stability
- increased rewetting ability by the wetting agent

Composition: 100 % white peat (H3 – H5)
+ wetting agent

Structure: fine

PH-value (H₂O): 5,5 - 6,5

We recommend **WPS fine B** for the filling of cultivation plates with small cells $\geq 2,5$ cm (Trays, multi plates etc.)

Packing: bags 250 l, Maxi-Block 4,5 m³ (EN)
